1.	Invitation for Tender Offers
----	-------------------------------------

BID Schedule

For

Bank Asia PLC (the “Bank”) hereby invites sealed quotations from qualified solution providers for the Procurement, supply, implementation, and support of a Litigation Management System. This initiative forms a key part of the Bank’s strategic roadmap to legal analysis, documenting, reporting, monitoring and strengthen data-driven decision-making. The proposed solution is expected to address existing challenges in case management, and provide actionable insights for business growth and operational efficiency, ensure robust MIS module for regulatory compliance, Risk management etc. Bank Asia PLC seeks proposals from experienced and reputable OEM / Vendors capable of delivering a robust, scalable, and secure LMS platform aligned with the Bank’s digital transformation objectives.

INVITATION TO BID

Bank Asia PLC invites tenders from well-reputed bidders, proposals to offer “Procurement, supply, implementation, Integration and support of a Litigation Management System (LMS), including software licenses and Annual Maintenance Contract (AMC) for Bank Asia PLC.”

IMPORTANT BID DETAILS:

1	Name of Project	Procurement, supply, implementation, Integration and support of a Litigation Management System (LMS), including software licenses and Annual Maintenance Contract (AMC) for Bank Asia PLC.
2	Date of commencement of issuance of Bidding/Tender/RFP Documents	<u>September 24, 2026</u>
3	Last date and time for availability of Bidding Documents	<u>September 30, 2026</u>
4	A pre-Bid meeting with Bidders (Date and Time)	<u>October 04, 2026, at 11:00 AM</u>
5	Last date and time for receipt of Bidding Documents	<u>October 11, 2026, at 02:30 PM</u>
6	Date and Time of Bid Opening	<u>October 11, 2026, at 03:00 PM</u>
7	Earnest Money Deposit Amount	Tk. 25,000/- (Taka twenty-five thousand only) Validity would be 1 (one) Year.
8	Place of opening of Bids	Logistics & Support Services Division (LSSD), Bank Asia PLC, Corporate Office, Bank Asia Tower (1 st Floor), 32 & 34, Kazi Nazrul Islam Avenue, Karwan Bazar, Dhaka.

Note: -

- Technical & Financial bids will be opened in the presence of Bidders who choose to attend as above. The above schedule is subject to change. Notice of any changes will be provided through e-mail from designated contact personnel.
- All data/information, submitted vide documentary proofs/company records along with this RFP, must be reported & will be treated as on the date of publication of this RFP.

1. Price Negotiation

Price Negotiation will be conducted by Bank Asia Purchase Committee/Bank's Senior Management as per Bank's policy and committee members agreed decision. Technically qualified top three bidders may get preference to invite financial negotiation to depend on committee decision.

2. Award of Contract

The Bank will award the Contract to the successful bidder. Before the expiration of the period of bid validity prescribed by the Bank and after successful negotiations, the Bank will notify the successful bidder that his bid has been accepted. The notification of the award will constitute the formation of the Contract. Upon the furnishing, by the successful bidder of a Performance Security (full warranty period), the Bank will promptly notify other bidders that their bids have been unsuccessful.

The successful bidder will have to submit 10% of the total value of the work order as performance guarantee minimum validity of performance guarantee will be till the tenure (full warranty period and AMC Period) of the contract or twelve months, whichever is later. The performance guarantee shall be invoked if the bidder fails to perform the assignments within the tenure of the contract, or in the event of the Bank terminating the contract due to non-performance and/or unsatisfactory performance. During this period, all complaints will be lodged with the OEM / vendor(s) and the OEM / vendor(s) must resolve them.

3. Bank's right to accept any bid and to reject any or all bids.

The Bank reserves the right to accept or reject any bid, and to annul the bidding process and reject all bids at any time before the award of the Contract, without thereby incurring any liability to the affected bidder or bidders or any obligation to inform the affected bidder or bidders of the grounds for the Bank's action

4. The signing of the contract / Work order

At the same time the Bank will notify the successful bidder that its bid has been accepted, the Bank will send the bidder the Form of Contract Agreement incorporating all agreements between the parties (the Bank & the OEM / Vendor) or will issue Work orders (where applicable). The successful bidder shall sign the Form and return it to the Bank within 5 working days of receipt of the Form of Agreement.

5. The process is confidential

Information relating to the examination, clarification, evaluation, and comparison of bids and recommendations for the award of a contract shall not be disclosed to the bidders or any other persons not officially concerned with such process until the award to the successful bidder has been announced. Any effort by a bidder to influence the Bank's processing of bids or award decisions may result in the rejection of the bidder's bid.

2.**Executive Summary**

Bank Asia PLC, established on November 27, 1999, began its journey with a vision to be a fully customer-focused and technology-driven bank. After obtaining its incorporation, business commencement, and banking licenses in 1999, the Bank was listed on both the Dhaka and Chittagong Stock Exchanges in January 2004. Over the years, Bank Asia has achieved a strong position in the banking sector through rapid yet sustainable growth.

Bank Asia operates through 135+ branches, supported by SME/Agriculture branches, SME Service Centers, Islamic Banking Windows and Offshore Banking Units, along with 170+ ATMs and 42+ CRMs and access to 8,523+ shared ATMs nationwide. As a pioneer of Agent Banking in Bangladesh, Bank Asia serves customers through 5,000+ Agent Banking outlets across the country.

Bank Asia's vision is to help build a poverty-free Bangladesh, ensuring human dignity and equal opportunities for all.

Background and Summary of Solution requirement:

The proposed solution is an integrated Legal, Litigation and Recovery Management System designed to manage the complete legal lifecycle from pre-litigation activities through litigation, auction, recovery and settlement. It will integrate with the Core Banking System (CBS) to provide accurate account-wise financial information, while also managing legal documents, hearing dates, statutory deadlines, warrants, legal costs, opinions, communications and assigned tasks. The solution is required to reduce manual processes and errors, ensure timely action on critical legal deadlines, improve accountability and transparency, and provide a centralized 360-degree view of each account and case. It will also provide management dashboards, reports, alerts and audit trails to support effective decision-making, regulatory compliance and overall legal and recovery performance.

3.	Objectives
----	-------------------

The objective of this RFP is to engage qualified OEMs/Suppliers/Vendors/Bidders to assist Bank's strategic roadmap to legal analysis, documenting, reporting, monitoring and strengthen data-driven decision-making. The proposed solution is expected to address existing challenges in case management, and provide actionable insights for business growth and operational efficiency, ensure robust MIS module for regulatory compliance, Risk management etc.

This RFP outlines the indicative requirements and functional specifications for a robust, scalable, and secure LMS. The technical specifications mentioned serve as minimum guidelines for design and implementation. It is the bidder's responsibility to propose optimal architecture, identify any missing components, and suggest improvements that ensure a comprehensive, future-ready LMS Solution framework aligned with the Bank's strategic objectives.

Any suggestions or modifications in design and scope should be communicated in writing (prior to the pre-bid meeting) to ensure all essential components are considered for the successful implementation and operation of the system in line with the objectives stated in this document.

The expected outcome is a comprehensive, centralized, and technology-driven Legal & Litigation Management framework for the Legal Department.

Implementation of the Litigation Management System is expected to deliver significant operational, financial, governance, compliance, and risk management benefits to Bank Asia PLC. The key anticipated outcomes are outlined below:

- ✓ **Business and Recovery Impact**
 - Improved monitoring of litigation, recovery, auction and settlement activities.
 - Better visibility of financial exposure and recovery status for each account.
 - Faster and more effective follow-up on legal and recovery matters.
- ✓ **Cost and Efficiency Impact**
 - Reduction of manual processes, duplicate work and administrative effort.
 - Automated generation of account-wise statements and legal-related information from CBS.
 - Better tracking and control of lawyer fees, court fees and other legal expenses.
- ✓ **Governance and Operational Impact**
 - Centralized management of cases, documents, tasks, communications and legal activities.
 - Clear assignment of responsibilities, case-wise history and accountability.
 - Real-time dashboards and management reporting for improved decision-making.
- ✓ **Compliance and Risk Management Impact**
 - Automated alerts for statutory deadlines, hearing dates, case filing, appeals and other critical legal milestones.
 - Reduced risk of missed deadlines, dormant cases and delayed legal actions.
 - Role-based access and complete audit trails to strengthen security, accountability and audit readiness.
- ✓ **Legal Department Effectiveness**
 - Improved coordination among Legal Officers, panel lawyers, branches and other stakeholders.
 - Single-window 360-degree view of account-wise litigation and recovery activities.
 - Faster access to legal opinions, vetted documents, notices, judgments and case records.

- ✓ **Data Analytics and Decision Support**
 - Real-time visibility of litigation portfolio, pending cases, recovery performance and legal costs.
 - KPI-based dashboards and periodic management reports.
 - Data-driven insights to support strategic legal and recovery decisions.

This Litigation Management System will enable Bank Asia PLC to transform from a fragmented and largely manual legal management environment into a centralized, integrated and insight-driven legal ecosystem, enhancing operational efficiency, strengthening compliance and governance, improving recovery effectiveness, and supporting better management decision-making.

4.	Scope of Work
----	---------------

Bidders are required to propose solutions as specified in the technical and financial proposal (two copies each) for Bank Asia PLC of the following item. Bidders are required to propose their solutions under one envelope system, one for technical proposals and the other for financial proposals. Bidders are required to quote for the items and are fully responsible for offered products and implementation of the same as specified in the terms and conditions.

The scope of the bid includes the Procurement, supply, implementation, and support of a Litigation Management System (LMS), including software licenses and Annual Maintenance Contract (AMC).

The Bank reserves the right to reduce or increase the quantity. The Bank also reserves the right to distribute the work among the bidders or assign it to a single bidder.

The successful bidder shall be responsible for the design, implementation, integration, configuration, customization, testing, deployment, and project coordination of the proposed Litigation Management System for the Legal Department of Bank Asia PLC. The bidder shall be responsible for providing all products, services, technical components, and supporting activities required for successful implementation of the solution.

The offer shall include the solution design and functionalities outlined in this document, together with any additional components, interfaces, configurations, or supporting features deemed necessary for successful implementation, even if not explicitly mentioned. During final integration and implementation, the selected solution provider shall work closely with the Bank's relevant departments and technology teams and shall remain responsible for the successful integration and operational readiness of the solution.

The selected solution provider will be responsible for implementing a centralized Litigation Management System for the Bank's Legal Department with the following key abilities:

a. Data Integration and Source Connectivity:

The system must be capable of seamless and secure integration with the Bank's existing and future systems required for legal, litigation, recovery, and reporting activities, including:

- **Core Banking Systems (CBS):** Integration with the Bank's relevant conventional, Islamic, offshore, and other CBS platforms/databases to retrieve account-wise customer and financial information, including outstanding balances, interest, unapplied interest, repayment history and classification status.
- **Recovery and Account Information:** Access to required account, recovery and financial information to support litigation, execution, settlement and recovery activities.
- **Document and Enterprise Systems:** Integration with relevant document management, workflow and enterprise systems where required for retrieval and archival of legal documents and records.
- **Regulatory and Reporting Interfaces:** Integration with relevant regulatory systems and data sources required for legal and compliance reporting.
- **Finance Systems:** Integration with Finance-related systems for processing and reconciliation of lawyer fees, court fees and other legal costs.
- **Enterprise Data Warehouse / MIS:** Integration with EDW, MIS and other reporting platforms where required for management dashboards, analytics and regulatory reporting.
- **Third-Party Systems and APIs:** Capability to integrate with approved third-party systems, APIs and middleware required to exchange legal, customer, account, recovery or other relevant information.

- **Real-Time and Batch Data Integration:** Support for real-time and batch data exchange using APIs, web services, message queues, ETL processes, database connectivity, or file-based interfaces as appropriate.
- **Bi-Directional Integration:** Where required, support secure bi-directional integration with CBS and other relevant Bank systems to ensure timely synchronization of information and transaction/status updates.

The integration framework shall ensure data accuracy, consistency, security, traceability and availability across the Litigation Management System and the Bank's relevant source systems, while minimizing manual data entry and duplication.

The detailed scope of work for each area is mentioned in the respective sections (Technical specification in detail).

5.	Evaluation of Proposals and BID Evaluation Methodology
-----------	---

Below Evaluation of Proposals and BID Evaluation Methodology applicable for the solution

5.1. Bid Evaluation Methodology

5.1.1. Minimum Eligibility Criteria (Technical)

The details of the 'Minimum Eligibility Criteria', provided by the bidder in its response to this RFP, will be evaluated first, based on the criteria described in this section. The technical and commercial responses to this RFP will be considered further only for those bidders who meet the Minimum Eligibility Criteria

Sl. No.	Criteria
1.	The Bidder should be a company registered under the Companies Act, or a partnership firm registered under Partnership Act in Bangladesh.
2.	Bidder/OEM would have completed implementations of the solutions and operations services for the last 3 years in at least 2 Bank/NBFI/Regulatory Bodies worldwide.
3.	Bidder/OEM should have the below-mentioned application listed in the latest industry standard report, which will be preferred to fulfill the Bank/NBFI business requirements: Litigation Management System (LMS)

Note:

- ✓ Bidder should submit documentary evidence (acceptable to the Bank) of the Information given in the related formats in respect of all above-mentioned criteria while submitting the proposal. The proposal of the bidder who does not fulfill the above criteria or who fails to submit documentary evidence to the satisfaction of the Bank would be rejected.
- ✓ Bidders fulfilling the Minimum Eligibility Criteria will only be considered for further technical evaluation.

5.1.2. Technical Evaluation

Selection will be based on the Quality and Cost Based Selection (QCBS) method. The breakdown of the evaluation components is as follows:

- Technical compliance and functionality
- Relevant experience and client references
- Implementation approach, training, and support
- Price and payment terms

The technical bid will be analyzed and evaluated, based on which the Technical Score (TS). The mark distribution criteria of the technical evaluation are as follows:

SCORING MATRIX (As per the specification)	
Item	Marks (60) *
Proposed solution Implementation experience (2=2, 3=3, 4=4, >5=5)	5
Technical specification compliance (Section 7) – scored on the A / PA / NA response	20
Functional requirement compliance (Section 8) – scored on the A / PA / NA response	30
Product demonstration, implementation approach, training and support plan	5

5.1.3. Financial Proposal/Commercial response:

The financial proposal marks will be calculated in 40 of the total evaluation criteria.

6.	Bidders Qualification, General Terms & Conditions
-----------	--

The bidder is expected to examine carefully the contents of the bidding documents. Failure to comply with the requirements of bidding submission will be at the bidder's own risk, which is not substantially responsive to the requirements of the bidding documents will be rejected. Manipulation or any kind of unusual approach or failure to submit the proposal/offer within the stipulated period will be treated as "Disqualification" to attend the bidding. Below terms and conditions below are applicable.

6.1 The bidder should be an Authorized Partner of the offer

- **Litigation Management System (LMS)**

The bidder must submit a valid Authorization Letter from the Original Software Manufacturer (OSM), OEM, or Solution Developer, confirming that the bidder is authorized to supply, implement, configure, integrate, and provide warranty/technical support and maintenance services for the proposed solution/application. The authorization must be valid for the proposed solution and remain effective throughout the implementation and warranty/support period.

6.2 The bidder as a registered company should have a legal entity to enter contracts with at least 3 years of experience in the relevant business.

6.3 The bidder should have their own/representative office and all-time presence in Dhaka with well-equipped service/support/ system up-gradation cells managed with adequate qualified technical personnel for installation, maintenance, and support to the proposed products/ systems/ solution.

6.4 The Tenderer shall submit a refundable Bid Security amounting to BDT 25,000/- (Taka twenty-five thousand only). The Bid Security must be furnished in the form of a Payment Order or an unconditional and irrevocable Bank Guarantee (BG), made in favor of 'Bank Asia PLC'.

6.5 The Bidder must be a regular taxpayer in Bangladesh and shall submit valid evidence of compliance with tax obligations, including an active TIN and the most recent Tax Clearance Certificate issued by the National Board of Revenue (NBR).

6.6 The bidder/OSM/OEM must have past performance on installation, commissioning, data migration, optimization, and maintenance of the relevant products for at least 3 (Three) organizations, preferably in the banking sector. Details of the experience and past performance of the bidder are to be submitted along with the bid in support of proof.

6.7 One in person / virtual pre-bid meeting will be held for more clarification (if any) at 11:00 AM on October 04, 2026. Attendance is strongly encouraged by all interested bidders.

6.8 Bidders must submit the following documents along with their offer and their offer would be in their own Letter Head Pad and signed by any authorized person:

- 1) 3 years' experience certificate in a similar type of project
- 2) Income Tax certificate (last Year)
- 3) VAT certificate
- 4) Valid Trade License/Memorandum
- 5) Company profile.

- 6) Provide a list of customer references for the mentioned solution in Bangladesh or Asia region with the name of the contact person, address, and telephone number.
 - 7) A distributorship Certificate' from the principal/Manufacturer must be submitted including a Draft SLA.
 - 8) Brief about post-implementation support facilities.
 - 9) Implementation and Rollout Plan.
 - 10) Detail project Implementation plan, schedule, Gantt chart, communication and escalation matrix, Assigned Project Manager, etc.
 - 11) Bidder must submit an excel sheet via email, with appropriate data for the following response immediately after dropping the bid at Bank Asia.
 - Technical specification response as guided format,
 - 12) All soft copies of information (Technical only) need to be submitted through email only after tender opening (October 11, 2026).
- 6.9 Bid security may be forfeited-
- i. If the bidder withdraws its bid during the period of bid validity specified in the bid form.
 - ii. If a successful bidder fails to sign the contract.
 - iii. If the bidder provides any false certificate and makes fraud and forgery at the time of bid submission.
- 6.10 The bidders should have to quote the unit price & total cost both in figure and words as per the given format and there should not be any cutting/erasing/overwriting.
- 6.11 If anyone wants to offer multiple solutions for the same product financial will be considered with the highest offer.
- 6.12 In the price proposal if the values in digits and words differ then the value in words will prevail. Again, if the total value does not match with the calculated value (Unit Price X Quantity) then the total value will be recalculated by multiplying the quantity by the unit price.
- 6.13 Emphasis will be given to the quality and technical details of the item(s). So, Bank is not bound to accept the lowest bid. Bank reserves the right to accept or reject any or all the quotations without arising any reasons whatsoever.
- 6.14 The Bank reserves the right to reduce or increase the quantity. The Bank shall have also reserved the right to distribute the work among the bidders or assign it to a single bidder.
- 6.15 VAT, Taxes, etc. shall be deducted from the bill as per the approved rate of the National Board of Revenue, Bangladesh.
- 6.16 VAT will be exempted from the price. If the OEM / vendor can provide the necessary documents as per NBR rules. In the absence of such eligible documentation, VAT shall be applied as per prevailing NBR guidelines.
- 6.17 If the Tenderer submits any wrong information, then the Bank reserves the right to reject their quotation partially or fully.
- 6.18 The supplier must obtain formal written work orders from the Bank management before supply and shall share NDA/Engagement Letter/SLA etc. as per Bank Policies.

- 6.19 The offer/bid must be made in an organized, structured, and neat manner. Brochures/leaflets etc. should not be submitted in loose form. The suggested format for submission of a technical offer is as follows:
- (i) Index
 - (ii) Covering letter.
 - (iii) Details of the bidder.
 - (iv) Warranty details (for all relevant schedules). Note that this should not contain any price information.
 - (iv) Delivery Schedule.
 - (v) Technical Documentation (Product Brochures, leaflets, manuals, etc.).
 - (vi) An index of technical documentation submitted with the technical offer/technical bid must be enclosed.
 - (vii) Offer/ bid must include photocopies of relevant documents/certificates for supporting claims and representations made by the bidder
 - (ix) The bidder should also include bidder capabilities in their technical bid.
- 6.20 Documents comprising the bid
The bid submitted by the bidder shall comprise two envelopes submitted simultaneously, one containing only the "Technical Proposal" and the other the "Financial Proposal" (Two copies each).
- 6.21 The technical proposal shall contain the following:
- a. Signed bid document.
 - b. Power of attorney (authorizing the person to sign and initial the bid document on behalf of the company);
 - c. Documents showing eligibility of the bidder as mentioned in this document.
 - d. Response to the eligibility criteria as mentioned in this document.
 - e. Technical description of the deliverables to demonstrate the specified technical requirement.
 - f. Response to the bidder's profile as mentioned in this document.
 - g. Response to the technical specification as mentioned in this document.
 - h. Bid form for technical proposal; and
 - i. Any other things required for the technical proposal.
- 6.22 The financial proposal shall contain the following:
- a. Bid security (Original);
 - b. Bid form for financial proposal.
 - c. Schedule for financial proposal as mentioned in this document; and any other things required for financial proposal
- 6.24 Bank Asia PLC reserves the right to adjust to any arithmetical or other errors in the bid, in the way Bank Asia PLC considers it appropriate or deem fit. Any adjustments made by Bank Asia PLC shall be stated to the bidder if Bank Asia PLC makes an offer to accept his bid. The final decision as to whether any error manifest or otherwise shall be at the sole discretion of Bank Asia PLC and be final, conclusive, and binding on the bidder.
- 6.25 Bidder/OSM/OEM must submit the description of their support team with the profile of experts on the items they will supply.

- 6.26 Bidder/OSM/OEM might have 2 (Two) ongoing AMC support on the offered product.
- 6.27 Bidder/OSM/OEM must provide regular software updates to the proposed system as part of its maintenance program. In this context, the bidder/OEM should provide their existing software update and patching schedule to demonstrate their software update rhythm.
- 6.28 During the implementation phase minimum of two (preferably one from OEM & One from partners) technical subject matter experts must be provided by the bidder on-site for the smooth functioning of solutions up to successful project completion.
- 6.29 Validity of Price Quotation must be for a minimum of 12 (twelve) months.
- 6.30 Bidder/OSM/OEM will have to ensure that their solution and support will be available for the next 6 (six) years.
- 6.31 The information provided by the bidders in response to this Tender Document will become the property of Bank Asia and will not be returned.
- 6.32 Bank Asia reserves the right to purchase partially, amend, rescind, or reissue this Tender Document, and all amendments will be advised to the bidders and such amendments will be binding on them.
- 6.33 Product warranty will be 03 (Three) years including support services, subscription, etc.
- 6.34 AMC (4th year) will be started after the warranty period (After the 3rd Year).
- 6.35 After completion of 03-year period, the next 03 (three) years' Annual Maintenance Contract (AMC) will be started automatically including full support services, subscriptions, etc. with the same AMC (4th, 5th & 6th Year) price. Bank may continue the AMC agreement for subsequent years. Payment will be made on a yearly basis.
- 6.36 The bidder should submit a "Technical Proposal" and "Financial Proposal" in a separate sealed envelope for each. The Bidder should submit a "Technical & Financial Proposal" with one additional copy in a sealed envelope for each.
- 6.37 Summary price should be given as per mentioned format in "9. Financial Proposal Submission Format".
- 6.38 Awarded Bidder must submit 10% of the total work order value as a bank guarantee before receiving the work order, which will be released after the successful completion of the Project. If a bidder fails to deliver all the products the Bank's Guarantee will be forfeited.
- 6.39 The Bidder must submit a draft copy of the SLA and NDA separately. NDA (Non-Discloser Agreements) must be signing both Local Supplier and OEMs with Bank as they work with Bank's Sensitive Data. The Supplier shall not, without the Bank's prior written consent, disclose the Contract, or any provision thereof, or any specification, plan, drawing, pattern, sample, or information furnished by or on behalf of the Bank in connection therewith, to any person other than a person employed by the Supplier in the performance of the Contract. Disclosure to any such employed person shall be

made in confidence and shall be extended only so far as may be necessary for purposes of such a performance.

- 6.40 The Bidders must submit each proposed solutions BOQ separately including the details of infrastructure.
- 6.41 The scope will not be limited to delivery, installation, configuration, and integration.
- 6.42 License details (module, user, etc.) must be submitted by the bidder
- 6.43 Standard operating procedure (SOP) needs to be provided after implementation of the solution.
- 6.44 Additional integration of devices/system with solution required for the agreed Channels before completing the UAT will be done by the bidder without any cost before handover or closer the project.
- 6.45 Maintain all the solution software support by 24/7/365 days without any interruption under the warranty or AMC.
- 6.46 Provide patches, updates, upgrades, Security Enhancement, bug fixes, and new project integration as required to maintain compliance and standard practice preferably without any service interruption.
- 6.47 The solution supplied by the bidder must coherently work with the existing applications aligned with present network & security policies of Bank Asia.
- 6.48 In the event of any Data Breach, Data Loss, or suspected security compromise occurring at any time when data is temporarily transmitted through or processed within the solution provider's cloud or any external system managed by the solution provider, the OSM / OEM / Vendor shall:
 - i. Notify the Bank in writing within 4 hours of becoming aware of the incident, providing immediate preliminary details;
 - ii. Submit a comprehensive incident report detailing the nature, cause, scope, timing, and potential impact of the breach;
 - iii. Cooperate fully with the Bank, its designated representatives, and relevant regulatory authorities (including Bangladesh Bank, if applicable) in investigating, mitigating, and resolving the incident;
 - iv. Take immediate corrective actions—at its own cost—to contain, mitigate, and remedy the effects of the breach, including full restoration of lost or corrupted data; and
 - v. Implement preventive measures to ensure that similar incidents do not recur, and provide the Bank with an assurance report outlining the remedial actions taken.All responsibilities, liabilities, and costs associated with a Data Breach or Data Loss, including investigation, recovery, regulatory compliance, and customer notification—shall rest entirely with the Bidder / Vendor / OSM / OEM etc.
- 6.49 All items should be delivered as per specifications, if different from the published specifications, the Bank authority will reserve the right to reject the same on the spot and payment will not be made for rejected items.

- 6.50 Proper bills of material (BOM) have to be provided for the quoted product.
- 6.51 The warranty period will start with the successful implementation of solutions for all the required echo systems.
- 6.52 Implementation diagram must be submitted with the technical proposal.
- 6.53 Solution provider requires to submit all necessary hardware specifications to operate the solution from day one.
- 6.54 According to the proposed solution necessary third-party software license, if required need to be mentioned in detail.
- 6.55 Training:
- The bidder shall arrange and conduct an implementation training program (technical) & Functional and extends the training scope wherever requires and number of sessions and participants based on need basis and shall not limited.
 - Training costs should be submitted separately from the product price.
 - A training schedule in the form of Gant chart and the CVs of the instructors must be submitted with the training proposal. Training should be provided after the work order is given and it should be completed within 1 (one) month of the day work order is received or subject to understanding during & after the successful implementation. In the event of training all the expenses, e.g., local travel, food, etc., should be borne by the bidder.
- 6.56 The Supplier will be entirely responsible for all applicable taxes, duties, levies, charges, and license fees in connection with the delivery of solution at the site as per Government rules & NBR.
- 6.57 No Advance will be paid. Payment shall be made after deducting VAT, Income Tax & other Govt. Taxes (if applicable) from the bill as per Government rule. Payment shall be made in the form of a Payment Order in favor of the form(s) only after successful completion of the work(s) complying with all specifications, terms & conditions. However, payment only after full and successful implementation. The Bid Security (Shall be valid for 1 year from bid submission date) and Performance guarantee (Shall valid up to end of AMC period) will be released after the successful completion of the AMC period. During this period, all complaints will be lodged with the OEM / vendor(s) and the OEM / vendor(s) must resolve them.
- 6.58 Penalty:
In the event of delay in completion of the project where the delays were not caused due to any fault with Bank Asia or any Force Majeure following provisions of penalty shall be applicable:
- a) 1% of the total price per week delay.
 - b) The maximum amount of the total penalty will be 10% of the total price.
 - c) For the avoidance of doubt, the date of the kickoff meeting with Bank Asia shall be used as the starting date of the project when calculating delays.
- 6.59 Delivery period:
Please mention the delivery deadline with the implementation period.

7.	Technical Specification Details
----	--

The selected solution provider will be responsible for enabling a Litigation Management System (LMS) for Bank with the following abilities in addition to details mentioned in scope of work (solution requirement) in section 4.

Physical Infrastructure Requirements

Solution providers are requested to provide details of the required infrastructure as follows:

- During UAT
 1. Server hardware specifications and quantity
 2. Resource requirements for each of the VM/Application servers
- During Go-Live for DC and DR
 1. Server hardware specifications and quantity
 2. Resource requirements for each of the VM/Application servers
- Solution and documents details containing the following information
 1. Assumptions details in preparing the proposal
 2. Services offered
 3. Overview of the solution
 4. Solution High-Level view
 5. Solution place in the security stack
 6. Solution modules and capabilities
 7. Implementation services details
 8. Manpower and Resource Requirement Plan
 9. Training services details
 10. Out of Scope Items
 11. Project organization
 12. Change control process
 13. Project deliverable acceptance
 14. Schedule of project responsibilities
 15. Project timeline
 16. Machine learning timeline

Details Technical Specifications: (A – Available, PA – Partially Available, NA – Not Available)

*Marks distribution A= 1 (100%), PA= 0.5 (50-80%), NA= 0 (0%). In case of feature which is currently unavailable but can be introduced in future should be mentioned in Remarks with possible timeline and will be evaluated based on that.

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
7.1 System Architecture:			
7.1.1.	System is built using a cloud-ready, modular, N-tier architecture, ensuring flexibility, scalability and ease of integration. Bidder should submit necessary documents, diagrams and illustrations having complete explanation	A	Modular N-tier microservices architecture. Compliant to al these requirements.

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
	of the system architecture including: a) End-user manual (Installation, operation and maintenance of server solution including database) b) Installation of solution on servers and clients c) Application Layer d) Configuration of the Solution e) Integration methods - e.g. API/Middleware, web services f) High Availability configuration and operation; failover tests g) Disaster Recovery Procedures h) Data flow diagrams with security and encryption descriptions i) Data dictionary j) Details description of all security parameters and configuration		
7.1.2.	Hardware and environmental Platform (Please mention detailed specifications and quantities in a separate attachment document)	Dell PowerEdge R760 platform (Ref: Table 16)	
7.2. System Support:			
7.2.1.	Provide all general application support. Bidder must maintain 10:00 AM to 06:00 PM, Sunday- Thursday help desk with adequate technical support personnel and infrastructure.	A	Dedicated Level 1/2/3 helpdesk & 24/7 SLA
7.2.2.	System support shall support dynamic enquiries	A	Dynamic multi-criteria query builder
7.2.3.	System support shall support remote monitoring and administration.	A	Web management console & secure monitoring
7.2.4.	System support shall support any updated browser	A	Responsive web UI for all modern browsers
7.2.5.	System support shall support multi-language	A	Bilingual English & Bengali (Unicode UTF-8)
7.2.6.	During UAT, along with test users, the system should have facility to enable tests to be run with simulated stored script in the Testing environment.	A	Automated script testing supported in UAT
7.2.7.	Software licenses are installable, configurable, and operable for live operation, enabling service from any site such as DC, near DR, and far DR environments.	A	Perpetual license for DC, Near DR & Far DR
7.2.8.	The system should have a feature for setting up static codes or reference codes.	A	Dynamic master parameter & code setup

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
7.2.9.	System shall have facility to display Bank logo in the system at the time of running the solution and during viewing & printing the reports or statement	A	Bank logo rendered on screens & reports
7.2.10	The system shall have facility to provide administration tools and procedures for ongoing support and maintenance, including customization, of the proposed solution	A	Comprehensive administrative console tools
7.2.11	Protocol support like HTTPS, SSL	A	TLS 1.3 / HTTPS encryption enforced
7.2.12	System support for Local customization, Validation and screen design	A	Local customization & screen validation
7.2.13	Secure network connectivity between Litigation and CBS/peripheral systems. Dedicated VLAN or secure segment recommended.	A	Secure dedicated VLAN & mTLS connectivity
7.2.14	Capacity of EOD configuration and data fetching or loading from CBS or other systems.	A	Automated EOD batch & delta loading from CBS
7.2.15	Facility of real time interface and application programming interface.	A	Real-time RESTful & SOAP API gateway
7.2.16	The system should have the facility to encrypt all the confidential information when being stored in the database and while being transferred through networks	A	AES-256 at-rest & TLS 1.3 transit encryption
7.3. Integration:			
7.3.1.	System shall have facility to allow Open-source architecture for integration of different systems in the bank including CBS	A	Open-source enterprise architecture & standards
7.3.2.	Systems shall have capacity to integrate with another platform and shall support single sign in. It can be web and app-based banking open platform architecture to integrate existing and upcoming channels, in-house software and security solutions.	A	Active Directory / LDAP Single Sign-On (SSO)
7.3.3.	Systems have facility to upgrade its field or logic or option for making the system compatible with change/upgrade bring in any interface for smooth operation.	A	Modular schema upgradable without downtime
7.3.4.	System shall have facility to integrate with following but not limited to: ▪ SMS server ▪ e-mail server	A	SMS Gateway & enterprise SMTP email integration
		A	Multi-channel alert queue with retry handling
7.3.5.	System should have capacity to send reminders and notification through SMS and Email on set interval/on demand basis.	A	Automated hearing & notice reminder engine

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
7.3.6.	System shall have an integrated facility for data warehousing Solutions.	A	Central Data Warehouse & MIS ETL integration
7.3.7.	Integration methods Rest /SOAP APIs, Batch or ETL processing, SFTP and open API framework for local customization.	A	REST/JSON, SOAP, SFTP & OpenAPI specs
7.4. Version Control			
7.4.1.	Ability to restore previous versions in case of multiple versions.	A	Document version control & rollback history
7.4.2.	Notification of changes to relevant users.	A	Real-time status change alerts to users
7.4.3.	Existing data (if any) must be migrated to the new system.	A	100% legacy litigation data migration
7.4.4.	Data Gap / No Legacy data maps to proposed solution:	A	Gap analysis & staging reconciliation tables
7.5. Process Configuration:			
7.5.1.	System shall have facility to support parallel processing of activity or flow where an application can be processed across more than one stage of activity	A	Parallel processing of civil & criminal suits
7.6. Business Rules:			
7.6.1.	The system shall have the capacity to incorporate a flexible, in-built business rules engine.	A	Parameterized business rules engine
7.7. Restrictions for Generation and View			
7.7.1.	System shall have facility to restrict any user/class/group (parameterized) for generation, authorization, view, report generation, etc.	A	Multi-tier role & branch permission matrix
7.8. Deployment Requirements			
7.8.1.	Bidder is requested to submit a complete deployment diagram with all interface requirements.	A	Comprehensive deployment topology submitted
7.8.2.	An on-premises solution is preferred (Data Center & Disaster Recovery). Ideals for environments require full data sovereignty and control. Privet cloud /hybrid deployment is optional.	A	100% on-premises deployment in Bank Asia DC & DR
7.8.3.	Test, UAT, and Production environments must be configured.	A	Dedicated Test, UAT, and Production tiers
7.9. User Functionality			
7.9.1.	License of the system shall be perpetual	A	100% perpetual enterprise bank-wide license
7.9.2.	Comprehensive role-based access control (RBAC) with granular permissions and audit trails.	A	Granular RBAC with audit logging
7.9.3.	All passwords are encrypted using industry-standard algorithms and securely stored in the database.	A	Bcrypt encrypted passwords
7.9.4.	System shall support to store password for each user in database in encrypted format	A	Salted cryptographic hash in database

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
7.9.5.	System shall have facility to maintain password validation as per bank policy	A	Configurable password policy as per bank rules
7.9.6.	System shall have facility to support single sign on.	A	Seamless Single Sign-On (SSO) supported
7.9.7.	The system shall have the facility to assign single or multiple roles to a user as per requirements.	A	Multiple role assignments supported per user
7.9.8.	The system should have flexibility to change user role, approval authority time to time as per requirement.	A	Dynamic role & authorization reassignment
7.9.9.	System shall have capacity to handle the access granting facility by administrator for user according to the assigned role & privileges, user type –Maker and/or Authorizer (Admin User Define).	A	Strict Maker-Checker segregation of duties
7.9.10	Systems shall have the facility to access or restrict the user in different functions and options/functions are granted or revoked for each user as per assigned role.	A	Menu & function access restricted per role
7.9.11	Integration with Active Directory or existing user management system.	A	Active Directory / LDAPS user sync
7.9.12	Audit trail and logs (view, edit, delete actions).	A	Immutable audit trail on all user actions
7.9.13	Encryption of data at rest and in transit.	A	AES-256 at rest and TLS 1.3 in transit
7.9.14	The system shall have the facility to maintain user groups as per the bank's policy.	A	Hierarchical user groups defined per bank policy
7.9.15	System shall have capacity to set user Terminal IP (case to case basis), Operating Time, Application Server IP, etc.	A	Terminal IP whitelisting & time restriction
7.9.16	The system shall have facility for recovering passwords by the User himself/herself with bank approved process.	A	Self-service password recovery with OTP
7.9.17	The system shall have facility for automatically logging out/session timeout the users after a predefined period of being idle.	A	Configurable idle session timeout (15 mins)
7.9.18	System shall have facility to allow the administrators to manually lock/deactivate the users/ unlock/reactivate the users and all the events should be recorded.	A	Administrative account lock & reactivation log
7.9.19	System shall have the facility to restrict the users to log into the system only from one workstation at a time	A	Single concurrent login per workstation
7.9.20	The system should have a facility to allow the users to build queries and generate reports from database/ audit trails.	A	Ad-hoc query builder & audit trail reports

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
7.9.21	System shall have facility for automatically locking next login if the maximum number (parameterized) of unsuccessful attempts is exceeded	A	Auto-lock after 5 consecutive failed logins
7.10. Disaster Recovery & Business Continuity:			
7.10.1	The system shall have facility for module-based redundancy and Business Continuity/Disaster Recovery plan including remote location.	A	Active-passive cluster & remote DR replication
7.10.2	The system should be capable of maintaining the uptime of 100% using the disaster recovery site. Mention all documents describing the disaster recovery planning.	A	99.9% uptime with RPO < 5 min, RTO < 15 min
7.10.3	System server and client software shall maintain its integrity in case of power failures and abrupt shutdowns.	A	ACID transactional integrity with WAL
7.10.4	The system shall be capable of restarting and recovering after system failure with no loss of data or software components.	A	Automated crash recovery with zero data loss
7.10.5	System shall have the capability to identify the existence of program and/or system discrepancies and issue an alert to the system administrator.	A	Real-time exception tracking & admin alerts
7.11. Security and Access Control:			
7.11.1	Role-based access control (RBAC).	A	Enterprise Role-based Access Control (RBAC)
7.11.2	Integration with Active Directory or existing user management system.	A	Active Directory LDAP authentication connector
7.11.3	System should have facility to maintain hash values of the passwords when being stored in the database.	A	Salted cryptographic password hashing
7.11.4	System shall have capacity for being browser independent and must be compatible with latest version of browser, operating system and database	A	100% browser independent web client
7.11.5	Systems have the capacity to protect all kinds of security threats (Internal/External).	A	Hardened security against internal & external threats
7.11.6	Fully adheres to OWASP Top 10 standards, including protection against injection attacks, XSS, CSRF, and more, with regular penetration testing.	A	Certified adherence to OWASP Top 10 standards
7.11.7	Systems have a facility to generate reports indicating the success/ failure of the batch processes. Any failure should be recorded with the failed item and the reason for failure.	A	Batch execution log with error reason tracking
7.11.8	The system should have facilities for applications to handle all possible	A	Graceful exception handling with friendly alerts

SL No	Particulars/Features/Descriptions	Bidder's Response (A/PA/NA)	Remarks
	exceptional and erroneous events and appropriate user-friendly error messages should be displayed. i.e. server level messages should not be displayed to the end user		
7.11.9	System shall have facility to support secure communications utilizing SSL/TLS over HTTPS for secure data transfer.	A	Enforced TLS 1.3 / HTTPS secure communications
7.11.10.	The system shall have facility for Users to query the logs for specific events and view filtered log reports, using a simple interface with fields for search and sorting parameters.	A	Searchable audit log querying console
7.11.11.	The system should be compatible with any new technology or upgraded technology that is integrated with the system: i. Server ii. Storage iii. Operating system iv. Database v. Network vi. Security solution	A	Open standards forward compatible with new tech
7.11.1	The Vendor must be capable of incorporate the relevant change immediately according to the recommendation of security advisories.	A	Rapid security patch release within 24-48 hrs
7.11.1	System should have facility to identify and authenticate specific devices before establishing a connection	A	Device fingerprinting & IP/MAC terminal binding
7.11.1	The vendor should share the security recommendation of overall platform.	A	Comprehensive security hardening guide provided
7.11.1	System must be compatible to integrate with all type of ISSS (Industry Standard Security Solution)	A	Compatible with SIEM, WAF and endpoint tools
7.11.1	All software, libraries and components used by the system must have valid licenses and are up to date.	A	100% up-to-date licensed enterprise components

8.	Functional Requirements
----	-------------------------

Details Technical Specifications: (A – Available, PA – Partially Available, NA – Not Available)

*Marks distribution A= 1 (100%), PA= 0.5 (50-80%), NA= 0 (0%). In case of feature which is currently unavailable but can be introduced in future should be mentioned in Remarks with possible timeline and will be evaluated based on that.

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.1.	User Group Management	A	Compliant
8.1.1.	The system should have the option to allow or disallow rights to different users for different workgroups.	A	Compliant
8.1.2.	View User Group	A	Compliant
8.1.3.	User Group filter/search option by User Group Name and User Group Code. (Exhaustive search option in different parameters required)	A	Compliant
8.1.4.	Add User Group	A	Compliant
8.1.5.	Edit User Group	A	Compliant
8.1.6.	Delete User Group	A	Compliant
8.1.7.	User Group wise Privilege/Right Setup	A	Compliant
8.2.	User Management	A	Compliant
8.2.1.	There should be a feature-rich user management module. Features should include creation, updating and deletion of user along with setting user privileges	A	Compliant
8.2.2.	User group wise access restriction to the menu/options. (Only Legal division allowed and other divisions to be restricted.)	A	Compliant
8.2.3.	View User (Multiple View user option required)	A	Compliant
8.2.4.	Edit User	A	Compliant
8.2.5.	Delete User	A	Compliant
8.2.6.	Send to Checker/Approver Function	A	Compliant
8.2.7.	Approve/Verify Function	A	Compliant
8.2.8.	There will be option of sending automatic email notification when user profile is successfully approved	A	Compliant
8.2.9.	The system should provide an option to unlock User IDs that are locked after exceeding the maximum number of incorrect login attempts	A	Compliant
8.2.10.	Deactivate User	A	Compliant
8.2.11.	Activate User	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.2.12.	Session policy: Option is available to set the session time.	A	Compliant
8.2.13.	Admin user should have the facility to reset user's password.	A	Compliant
8.3.	Login	A	Compliant
8.3.1.	There will be option to login to the system using user Id and password.	A	Compliant
8.3.2.	There will be option lock user account if try to login by wrong password for 5 times.	A	Compliant
8.3.3.	Password Reset Functionality The system shall provide a secure mechanism for users to reset their own passwords in the event they forget their existing password. The feature must allow users to initiate the password reset process independently without administrative intervention, ensuring confidentiality, integrity, and ease of access.	A	Compliant
8.4.	Parameter Management	A	Compliant
8.4.1.	Department	A	Compliant
8.4.2.	Designation	A	Compliant
8.4.3.	Functional Designation	A	Compliant
8.4.4.	Case Type	A	Compliant
8.4.5.	Security Status/Details	A	Compliant
8.4.6.	Auction Status	A	Compliant
8.4.7.	Business Status/ Nature	A	Compliant
8.4.8.	Borrower Status	A	Compliant
8.4.9.	Guarantor Status	A	Compliant
8.4.10.	Loan/investment Segment nature	A	Compliant
8.4.11.	Cheque Status	A	Compliant
8.4.12.	Facility/investment Type	A	Compliant
8.4.13.	Case Steps	A	Compliant
8.4.14.	Retail Branch	A	Compliant
8.4.15.	District	A	Compliant
8.4.16.	Branch	A	Compliant
8.4.17.	Expense Type	A	Compliant
8.4.18.	Court Type	A	Compliant
8.4.19.	Court List	A	Compliant
8.4.20.	Lawyer List	A	Compliant
8.4.21.	Functional Designation	A	Compliant
8.4.22.	Disposal Status	A	Compliant
8.4.23.	Paper List with add option	A	Compliant
8.4.24.	Paper Vendor List with add option	A	Compliant
8.4.25.	CL Status	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.4.26.	Nature Of Warrant of Arrest and status of W/A	A	Compliant
8.4.27.	Expense activities	A	Compliant
8.4.28.	Supreme Court (SC) Case Category	A	Compliant
8.4.29.	Supreme Court (SC) Case Type	A	Compliant
8.4.30.	Supreme Court (SC) Case Status	A	Compliant
8.4.31.	Execution Criteria /Stage of Execution Case	A	Compliant
8.4.32.	Appeal Bail Type	A	Compliant
8.4.33.	schedule charges case against bank	A	Compliant
8.4.34.	schedule charges legal affairs (Litigation/ Documentation/Others	A	Compliant
8.4.35.	related authority	A	Compliant
8.4.36.	HC Division and AD	A	Compliant
8.5.	Holiday Setup	A	Compliant
8.5.1.	There will be option to setup holiday. Of the Court of Bangladesh	A	Compliant
8.5.2.	Holiday Setup allows defining court-wise holidays based on selected court type and holiday details: - Court Type: - Lower Court - High Court	A	Compliant
8.5.3.	Holiday Date(s): The specific date or range of dates to be marked as holiday	A	Compliant
8.5.4.	Court-wise Applicability: Option to assign holiday only for Lower Court, only for High Court	A	Compliant
8.6.	Lawyer Package Bill Setup	A	Compliant
8.6.1.	There should be option to setup lawyer package Bills.	A	Compliant
8.6.2.	Lawyer Package Bill Setup allows managing lawyer billing packages with the following features:	A	Compliant
8.6.3.	Add Package: Create a new package with defined amount, validity period, and applicable conditions.	A	Compliant
8.6.4.	Edit Package: Modify existing package details such as amount, duration, or other attributes.	A	Compliant
8.6.5.	Delete Package: Remove an existing package from the system when no longer applicable.	A	Compliant
8.6.6.	Verify Package: Validate and approve the package details before activation or billing.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.6.7.	Extend Package Amount: Increase or adjust the package amount as per requirement.	A	Compliant
8.7.	Dashboard	A	Compliant
8.7.1.	A real-time statistics dashboard displays the daily status of legal activities, including notices, approvals, auctions, case updates, professional bills, and court schedules. This allows users to instantly monitor workload, track case progress, and assess overall operational performance. (Daily case list dashboard with details case updates required)	A	Compliant
8.8.	1st Legal Notice/ Reminder Notice	A	Compliant
8.8.1.	1st Legal Notice Module enables end-to-end management of legal notices with the following features:	A	Compliant
8.8.2.	Add, Edit, and Delete: Create new legal notices, update existing ones, or remove when required.	A	Compliant
8.8.3.	Send to Checker: Forward prepared notices for review and validation.	A	Compliant
8.8.4.	Verify: Approve notices after checker validation to ensure accuracy.	A	Compliant
8.8.5.	System-Generated Notices: Automatically generate legal notices based on predefined rules and criteria.	A	Compliant
8.8.6.	Customer Search (CBS Integration): Retrieve customer details directly from the Core Banking System (CBS) through API integration using Account Number, Card Number, Mobile Number or any other parameter.	A	Compliant
8.8.7.	There should be a view page displaying legal notice/reminder notice, primarily showing details such as Loan AC/Card Number, Status etc.	A	Compliant
8.8.8.	There should be a view page displaying the history of served Legal notices through the application, primarily showing Reference Number, Loan AC/Card Number, and Status.	A	Compliant
8.9.	Case Merit Analysis (CMA)	A	Compliant
8.9.1.	There should be option for Case Merit analysis. Add, Edit, and Delete: Create new CMA Request, update existing ones, or remove when required.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.9.2.	The system shall provide comprehensive facilities for conducting pre-case merit analysis, enabling users to evaluate the viability and strength of a case prior to filing. The functionality shall support detailed assessment, structured documentation, and systematic recording of findings to assist in informed decision-making.	A	Compliant
8.9.3.	File Archiving: Securely store and manage a wide range of related documents.	A	Compliant
8.9.4.	Security Documents (for Secured Loans): Maintain all collateral and security-related paperwork in an organized manner.	A	Compliant
8.9.5.	Sanction Letters: Archive sanction and approval letters for reference and compliance.	A	Compliant
8.9.6.	Facility Details: Record and track loan or facility-specific information.	A	Compliant
8.9.7.	Guarantor Details: Preserve guarantor-related documents and information for quick retrieval.	A	Compliant
8.9.8.	There should be option to make and check the request at branch level.	A	Compliant
8.9.9.	The system should automatically create the request from while initiating the request.	A	Compliant
8.9.10.	There should be option to make and check the request at head office level.	A	Compliant
8.9.11.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.9.12.	There should be option to send email and SMS notification to checker at the time of initiate, reject and complete the request.	A	Compliant
8.9.13.	A mechanism should be implemented to prevent the submission of a new request for a same customer if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.9.14.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.9.15.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.9.16.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.9.17.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.9.18.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.9.19.	A dedicated end-to-end pre-litigation workflow with defined TAT tracking and escalation is required	A	Compliant
8.9.20.	A dedicated land/property legal vetting workflow with title verification, mutation/encumbrance review, feedback and vetting status required	A	Compliant
8.10.	Auction Management	A	Compliant
8.10.1.	The system shall provide a complete and compliant workflow for managing the auction process in line with legal and organizational requirements. The functionality shall include, but not be limited to, the following features	A	Compliant
8.10.2.	Auction Record Creation – Facility to create and register new auction cases with all relevant details.	A	Compliant
8.10.3.	Auction Record Validation – Ability to review and validate entered information prior to further processing. (Auction approval process of Management required)	A	Compliant
8.10.4.	Publication Management – Capability to manage the process of publishing auction notices in newspapers or other approved media.	A	Compliant
8.10.5.	System-Generated Publication Copies – Automatic generation of legally compliant publication copies (e.g., 12(3), 33(5), 33(7)) for circulation and record-keeping.	A	Compliant
8.10.6.	Bidder Information Management – Provision to capture and maintain bidder details, including identification, contact information, and bid amounts.	A	Compliant
8.10.7.	Final Auction Memo Preparation – Automated generation of the Final Auction	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	Memo with all required details, produced in an editable format to allow review, modification, and confirmation before finalization.		
8.10.8.	There should be option to upload the documents based on customer type.	A	Compliant
8.10.9.	There should be option to make and check the request at branch level.	A	Compliant
8.10.10.	There should be option to make and check the request at head office level.	A	Compliant
8.10.11.	There should be option to send email and SMS notification to paper vendor and other stake holder as required time to time (concerned Department like Public Relation Dept., etc.)	A	Compliant
8.10.12.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.10.13.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.10.14.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.10.15.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.10.16.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.10.17.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.11.	Account Statement Generation	A	Compliant
8.11.1.	The system shall enable automated creation of customer account statements with the following features	A	Compliant
8.11.2.	CBS Data Integration – Automatic fetching of account data from the Core Banking	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	System (CBS) through secure API integration.		
8.11.3.	Interest Application – Application of predefined or user-defined interest rates to support manual or exceptional calculations, where required.	A	Compliant
8.11.4.	Automated Statement Generation – Generation of accurate and up-to-date customer account statements by combining CBS data with calculated values.	A	Compliant
8.12.	Jari Statement with Certificate	A	Compliant
8.12.1.	The system shall provide end-to-end facilities for generating <i>Aurtho Jari</i> certificates and statements with the following features	A	Compliant
8.12.2.	Jari Statement Generation – Automatic generation of detailed <i>Jari</i> statements based on data retrieved from the Core Banking System (CBS) combined with applied calculations.	A	Compliant
8.12.3.	Jari Certificate Creation – Creation of official <i>Jari</i> certificates in a system-generated format to ensure accuracy, consistency, and compliance with applicable standards.	A	Compliant
8.13.	Lower Court Suit Management	A	Compliant
8.13.1.	Lower Court Suit File Module The system shall streamline the management of lower court case files with the following features	A	Compliant
8.13.2.	Suit File Management – Facility to create new suit files, update existing records, or remove entries as required.	A	Compliant
8.13.3.	File Reassignment – Option to reallocate suit files to another user or department when necessary.	A	Compliant
8.13.4.	Arji Copy Upload – Provision to upload and manage <i>Arji</i> copies directly within the case file. (Any sort of case related documents like summons/orders etc. required to be uploaded.	A	Compliant
8.13.5.	Legal Expense Recording – Facility to input and maintain expense details associated with each suit, ensuring accurate tracking and reporting.	A	Compliant
8.13.6.	There should be option to make and check the request at branch level.	A	Compliant
8.13.7.	There should be option to make and check the request at head office level.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.13.8.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.13.9.	There should be option to send email and SMS notification to lawyer and Case Deal Officer at the time of initiate, reject and complete the request.	A	Compliant
8.13.10.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.13.11.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.13.12.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.13.13.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.13.14.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.13.15.	Hearing/limitation tracking, dormant/long-pending accountability and explicit certified-copy preservation should be validated against detailed workflows	A	Compliant
8.14.	Case Steps update	A	Compliant
8.14.1.	The system shall allow daily tracking of case progress and associate expenses with the following features:	A	Compliant
8.14.2.	Day-by-Day Case Updates – Facility to record and monitor each step of a case on a daily basis for accurate progress tracking.	A	Compliant
8.14.3.	Lawyer Expense Entry – Provision to input and maintain lawyer-related expenses alongside case updates to ensure proper cost management.	A	Compliant
8.14.4.	Bill Selection from Lawyer Package Bills – Option to select and associate relevant bills from predefined lawyer package bills	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	for accurate expense tracking and reporting.		
8.14.5.	There should be option to make and check the request at branch level.	A	Compliant
8.14.6.	There should be option to make and check the request at head office level.	A	Compliant
8.14.7.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.14.8.	There should be option to send email and SMS notification to Case Dealing Officer, reject and complete the request.	A	Compliant
8.14.9.	An automated notification system that alerts concerned officers, panel lawyers, and supervisors of upcoming hearing dates, limitation deadlines, and critical case milestones via: a. Email notifications. b. Push notifications (mobile and desktop). c. In-system alerts and reminders.	A	Compliant
8.14.10.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.14.11.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.14.12.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log	A	Compliant
8.14.13.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'	A	Compliant
8.14.14.	A complete log history should be maintained for each request, including every instance the request has been returned	A	Compliant
8.14.15.	Structured legal representative feedback, automated no-update escalation and supervisor acknowledgement workflow is required	A	Compliant
8.15.	Arising Case from Original Case	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.15.1.	The system shall manage all subsequent cases originating from an original suit with the following features:	A	Compliant
8.15.2.	Multiple Execution Suit Entry – Facility to record and maintain details of multiple execution suits linked to the same original case.	A	Compliant
8.15.3.	Session Case Tracking – Provision to capture and monitor related session cases as part of the arising case workflow.	A	Compliant
8.15.4.	Merged Suit Monitoring – Systematic tracking and consolidation of information from all linked suits, including 1st Execution Suit, 2nd Execution Suit, Session Case, and others.	A	Compliant
8.15.5.	Integrated Case History – Maintenance of a comprehensive relationship map between the original case and all arising cases to facilitate easy reference and monitoring.	A	Compliant
8.15.6.	There should be option to make and check the request at branch level.	A	Compliant
8.15.7.	There should be option to make and check the request at head office level	A	Compliant
8.15.8.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.15.9.	The system should provide an option to send email and SMS notifications to the case dealing officer for file execution cases following the judgment of an ARA-2003 case. (Including all the stakeholder id deemed necessary like Manager/DM/CLO/Law Officer etc.)	A	Compliant
8.15.10.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request	A	Compliant
8.15.11.	There should be an option to return or reject a request with a specified reason	A	Compliant
8.15.12.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.15.13.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'	A	Compliant
8.15.14.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.16.	Bill Processing and Disbursement Module	A	Compliant
8.16.1.	The system shall manage the selection, verification, and disbursement of bills generated from various sources, ensuring proper tracking, approval, and settlement of legal and operational expenses. The functionality shall include the following features	A	Compliant
8.16.2.	Integrated Bill Selection – Facility to retrieve and process bills submitted from other sources, including:	A	Compliant
8.16.3.	Lawyer Professional Bills The system shall allow entry, tracking, and management of all professional fees and charges submitted by lawyers. It shall include functionality to capture detailed information such as lawyer name, case reference, bill period, service description, fee amount.	A	Compliant
8.16.4.	Court Fees The system shall facilitate recording, verification, and disbursement of all court-related fees. This includes filing fees, hearing fees, and any other statutory payments. The functionality shall ensure fees are correctly allocated to the respective cases, support validation against legal requirements, and maintain an auditable log of all transactions.	A	Compliant
8.16.5.	Paper Publication Bills The system shall manage bills related to public notices and advertisements in newspapers or other media. It shall support capturing details such as publication type, dates, media outlet, publication cost, and associated case or event. The system shall also enable approval workflows, and retention of publication copies for compliance and audit purposes.	A	Compliant
8.16.6.	Court Entertainment Bills The system shall provide for recording, verification, and settlement of court-related	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	entertainment or hospitality expenses. It shall allow entry of expense details, allocation to relevant cases or events, and ensure approval before disbursement. All records shall be maintained in a structured manner to enable reporting, monitoring, and audit.		
8.16.7.	Staff Conveyance Bills The system shall handle bills related to staff travel and conveyance, including local and outstation trips. It shall capture travel details such as date, purpose, distance, mode of transport, and associated costs. The system shall support verification, approval workflows, linking to projects or cases, and maintaining an auditable history of all staff conveyance expenses. * Option of Miscellaneous Bill like Mutation Bill/ Warrant Execution Bill etc. required.	A	Compliant
8.16.8.	There should be option to upload evidence documents (Invoice/Memo etc.).	A	Compliant
8.16.9.	There should be option to make and check the request at branch level.	A	Compliant
8.16.10.	There should be option to make and check the request at head office level.	A	Compliant
8.16.11.	There should be option to update data directly to CBS through API integration.	A	Compliant
8.16.12.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.16.13.	Direct Finance Division integration for payment processing	A	Compliant
8.16.14.	There should be option to send email and SMS notification to lawyer or other stockholders after disbursement of bill.	A	Compliant
8.16.15.	There should be an option to download the Bill Memo in PDF format for obtaining a physical bill.	A	Compliant
8.16.16.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.16.17.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along	A	Compliant

SL	Details Requirements	Bidder's Response

	with the reference number of the existing pending request		
8.16.18.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.16.19.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.16.20.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.16.21.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.16.22.	Partial/full recovery entry, settlement proposal workflow, negotiation status, compromise deed/solenama management and CBS reconciliation as a dedicated module	A	Compliant
8.17.	Court Fee Return and Adjustment	A	Compliant
8.17.1.	The system shall provide comprehensive facilities to manage unutilized court fees and ensure proper financial adjustments in compliance with organizational and legal requirements. The functionality shall include the following features:	A	Compliant
8.17.2.	Court Fee Return – The system shall allow for the return of court fees provided to a lawyer in cases where the suit is not filed. It shall support capturing details such as case reference, lawyer information, fee amount, reason for return, and date of transaction. The system shall ensure proper validation and approval before processing the return.	A	Compliant
8.17.3.	Court Fee Adjustment – The system shall enable unutilized court fees to be adjusted against fees for the lawyer's next assigned case. This functionality shall allow linking of returned fees to future case allocations, automatically updating balances and maintaining consistency across financial records.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.17.4.	Audit & Compliance – The system shall ensure transparency and compliance in the management of court fee transactions. It shall maintain a complete historical log of all returns and adjustments, enabling internal and external audits while supporting regulatory and organizational accountability requirements.	A	Compliant
8.17.5.	There should be option to upload evidence documents	A	Compliant
8.17.6.	There should be option to make and check the request at branch level.	A	Compliant
8.17.7.	There should be option to make and check the request at head office level.	A	Compliant
8.17.8.	There should be option to update data directly to CBS through API integration.	A	Compliant
8.17.9.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.17.10.	There should be option to send email and SMS notification to lawyer at the time of initiate, reject and complete the request.	A	Compliant
8.17.11.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.17.12.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.17.13.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.17.14.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.17.15.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.17.16.	A complete log history should be maintained for each request, including	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	every instance the request has been returned.		
8.18.	HC & AD Matters Feature	A	Compliant
8.18.1.	The system shall facilitate comprehensive management of High Court and Appellate Division cases, providing flexible filing, tracking, and expense management functionalities. The system shall include the following features:	A	Compliant
8.18.2.	Case Filing Options – The system shall support multiple options for filing HC & AD cases: - Filing HC & AD cases directly against an existing Lower Court case, ensuring linkage and continuity of case information. - Initiating a fresh, independent HC & AD case without dependency on any prior case, with full case registration and documentation capabilities. *Upload of High Court Order/ application copy etc required.	A	Compliant
8.18.3.	Arising Case Management – The system shall provide the capability to record and track arising cases originating from the original case. This shall include execution suits, appeals, and any related legal matters, enabling seamless monitoring of all associated proceedings.	A	Compliant
8.18.4.	Lawyer Expense Management – The system shall allow entry, tracking, and management of lawyer-related expenses associated with each HC & AD case. The functionality shall include detailed recording of fee amounts, service descriptions, dates, and applicable taxes to ensure accurate financial reporting and accountability.	A	Compliant
8.18.5.	Integrated Case History – The system shall maintain a complete linkage between the original Lower Court case and all corresponding HC & AD matters. This functionality shall enable consolidated monitoring, easy reference, and comprehensive reporting of the case lifecycle across courts.	A	Compliant
8.18.6.	There should be option to make and check the request at branch level.	A	Compliant
8.18.7.	There should be option to make and check the request at head office level.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.18.8.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.18.9.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.18.10.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.18.11.	There should be an option to return or reject a request with a specified reason	A	Compliant
8.18.12.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.18.13.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'	A	Compliant
8.18.14.	A complete log history should be maintained for each request, including every instance the request has been returned	A	Compliant
8.19.	Case Against Bank Feature	A	Compliant
8.19.1.	The system shall provide comprehensive facilities to record, track, and manage all legal cases filed against the bank. The functionality shall include the following features:	A	Compliant
8.19.2.	Case Data Entry – Facility to input and maintain detailed information for each case filed against the bank, including case reference, filing date, involved parties, status, and relevant documentation.	A	Compliant
8.19.3.	Lawyer Bill Integration – Provision to capture, track, and manage lawyer professional bills associated with each case. The system shall also allow selection of bills from predefined lawyer package bills, enabling accurate and efficient expense allocation.	A	Compliant
8.19.4.	Centralized Repository – Maintenance of a structured and searchable archive of all cases against the bank, facilitating easy retrieval, monitoring, and reporting of case information.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.19.5.	There should be option to make and check the request at branch level.	A	Compliant
8.19.6.	There should be option to make and check the request at head office level.	A	Compliant
8.19.7.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.19.8.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed	A	Compliant
8.19.9.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request	A	Compliant

8.19.12.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'	A	Compliant
8.19.13.	A complete log history should be maintained for each request, including every instance the request has been returned	A	Compliant
8.20.	Employee Related & Other Legal Affairs Suit Module	A	Compliant
8.20.1.	This component manages legal cases that are not directly linked to customer accounts but arise from internal or miscellaneous matters. Key features include:	A	Compliant
8.20.2.	Employee-Related Cases: Record and track suits involving employees, such as service disputes, disciplinary issues, or employment-related claims.	A	Compliant
8.20.3.	Other Legal Affairs: Manage miscellaneous legal cases not categorized under standard	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	areas (e.g., contractual disputes, regulatory issues).		
8.20.4.	Lawyer Bill Entry: Input and monitor lawyer professional bills connected to these cases.	A	Compliant
8.20.5.	Centralized Record Keeping: Maintain a structured repository of employee-related and other legal suits for compliance, monitoring, and future reference.	A	Compliant
8.20.6.	There should be option to make and check the request at branch level.	A	Compliant
8.20.7.	There should be option to make and check the request at head office level.	A	Compliant
8.20.8.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.20.9.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant
8.20.10.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.20.11.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.20.12.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.20.13.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.21.	Authorization Management	A	Compliant
8.21.1.	The system shall enable branch users to create, submit, and manage authorization requests for various legal and operational actions requiring approval from the Head Office. This functionality shall ensure proper workflow, maintain a complete audit trail, and support centralized	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	decision-making. The system shall include the following features		
8.21.2.	Plaintiff Change Request – Allow branch users to submit requests to change the plaintiff of a case. Each request shall capture details such as case reference, current plaintiff, proposed new plaintiff, reason for change, and supporting documents. Requests shall be routed to the Head Office for approval, with the decision history maintained and case records updated upon approval.	A	Compliant
8.21.3.	Withdrawn Request – Provide functionality for users to request withdrawal of a filed case. Each withdrawal request shall include case details, reason for withdrawal, associated costs, and relevant documentation. Approval workflows shall be managed centrally, with a full audit trail maintained.	A	Compliant
8.21.4.	Appeal Bail Money Withdraw – Support requests for withdrawing bail money related to appeal cases. Users shall enter case reference, withdrawal amount, applicable lawyer or bank details, and justification. The system shall facilitate verification, approval, and accurate tracking of all related financial transactions.	A	Compliant
8.21.5.	Court Change Request – Allow submission of requests to change the court handling a specific case. Each request shall capture current court, proposed new court, case reference, reason for change, and supporting documentation. Approval workflows shall be routed to the Head Office, and all changes reflected in case records.	A	Compliant
8.21.6.	Other Requests (Configurable) – Provide a configurable option to add additional types of authorization requests as needed, including a flexible interface for defining request types, input fields, approval workflows, and reporting mechanisms to	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	accommodate evolving operational and legal requirements.		
8.21.7.	There should be option to make and check the request at branch level.	A	Compliant
8.21.8.	There should be option to make and check the request at head office level.	A	Compliant
8.21.9.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.21.10.	There should be option to send email and SMS notification to HO User at the time of initiate, reject and complete the request.	A	Compliant
8.21.11.	There should be an option to download the requested authorization in PDF format for obtaining a physical signature.	A	Compliant
8.21.12.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.21.13.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.21.14.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.21.15.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.21.16.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.22.	Warrant Of Arrest Management	A	Compliant
8.22.1.	The system shall enable branch users to create, submit, and manage Warrant of Arrest (WOA) requests for cases, track the arrest history of individuals, and record expenses related to warrant execution. This functionality shall ensure proper workflow, monitoring, and financial tracking. The system shall include the following:	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.22.2.	Arrest Recording – The system shall allow users to record details of individuals arrested under a WOA. Each entry shall capture the following information: - Person Type: Borrower or Guarantor - Name: Full name of the individual - Arrest Date: Date of arrest - Arresting Officer / Agency: Optional field for specifying the officer or agency responsible - Remarks: Additional comments or observations The system shall support recording multiple arrests for the same WOA request over time, maintaining a complete chronological history of all related arrests	A	Compliant
8.22.3.	WOA Execution Bill Entry – The system shall allow users to record and manage expenses related to the execution of warrants. Each bill entry shall capture: - Bill Date: Date of the expense - Bill Amount: Amount incurred for the WOA execution - Bill Type: Category of the expense (e.g., Legal, Travel, Police/Agency Fee, Miscellaneous) - Supporting Documents: Upload capability for invoices, receipts, or other relevant documents The system shall maintain an auditable record of all execution-related expenses, ensuring proper financial tracking and reporting.	A	Compliant
8.22.4.	There should be option to make and check the request at branch level.	A	Compliant
8.22.5.	There should be option to make and check the request at head office level.	A	Compliant
8.22.6.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.22.7.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.22.8.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.22.9.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.22.10.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.22.11.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.22.12.	Proper tracking of issuance/service/enforcement for all warrant types and escalation facility for unexecuted warrants	A	Compliant
8.23.	Appeal Bail Money Deposit & Withdraw Management	A	Compliant
8.23.1.	The system shall enable branch users to manage the deposit of bail money by arrested clients and track withdrawals related to appeal cases, including associated expenses. This functionality shall ensure proper financial recording, maintain a complete audit trail, and support workflow management between branches and the Head Office/Bank. The system shall include the following features:	A	Compliant
8.23.2.	Bail Money Deposit Entry – The system shall allow users to record details of deposited bail money for each case. Each deposit entry shall capture the following information: - Case Number / Appeal Number: Unique identifier of the case - Client Name: Name of the arrested person - Amount Deposited: Total bail amount deposited - Deposit Date: Date of deposit - Deposit Mode: Cash, Bank, or Other - Receipt Number / Transaction ID: Reference for verification	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	The system shall also allow uploading of supporting deposit receipts or documents to ensure accurate recordkeeping and audit compliance.		
8.23.3.	Bail Money Withdrawal – The system shall provide the ability to search previously deposited bail money using filters such as Case Number, Client Name, Deposit Date, and Receipt Number. Users shall be able to initiate a withdrawal request capturing: - Withdraw Amount: Amount to be withdrawn - Withdrawal Date: Date of withdrawal - Related Expenses: Expenses such as legal fees, bank charges, or service charges associated with the withdrawal - Supporting Documents: Upload of invoices or bills, if applicable The system shall ensure all withdrawal transactions are properly authorized and recorded	A	Compliant
8.23.4.	Status and History Tracking – The system shall maintain a complete history of deposits and withdrawals for each client or case, enabling: - Viewing detailed deposit and withdrawal records - Tracking total deposited amount, total withdrawn, and remaining balance - Supporting audit, reporting, and financial reconciliation	A	Compliant
8.23.5.	There should be option to make and check the request at branch level.	A	Compliant
8.23.6.	There should be option to make and check the request at head office level.	A	Compliant
8.23.7.	There should be an option to check the current status of a request along with a complete activity log at any time through an enquiry feature	A	Compliant
8.23.8.	A mechanism should be implemented to prevent the submission of a new request if there is already a pending one, unless the existing request has been either rejected or completed.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.23.9.	When creating a new request, if a pending request already exists, the system will display a message indicating this, along with the reference number of the existing pending request.	A	Compliant
8.23.10.	There should be an option to return or reject a request with a specified reason.	A	Compliant
8.23.11.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant
8.23.12.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.23.13.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.23.14.	Mobile app (Android/iOS) or responsive web portal.	A	Compliant
8.23.15.	Mobile access for legal officers to check case status, upload notes, and view court schedules while on-the-go.	A	Compliant
8.23.16.	Secure login with Multi-Factor Authentication (MFA).	A	Compliant
8.23.17.	Offline data entry option with sync once internet is available.	A	Compliant
8.24.	Document Upload	A	Compliant
8.24.1.	The system shall enable users to efficiently upload, store, manage, and retrieve legal-related documents. The functionality shall ensure centralized document storage, secure access control, audit traceability, and easy search and retrieval. The system shall include the following features:	A	Compliant
8.24.2.	Document Upload – The system shall allow users to upload multiple types of documents, including PDF, Word, Excel, images, and scanned files. For each document, the system shall capture the following metadata: Document Title / Name – The name or title of the document	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	Case Number / Reference Number – Optional link to the relevant case or reference Document Type / Category – Examples include Petition, Warrant of Arrest (WOA), Bail Receipt, Legal Notice, Court Order, Complaint, FIR, Written Statement/objection or Others documents as required time to time. Branch / Department – Originating branch or department Uploaded By – Automatically captured system user information Upload Date – Automatically captured system date and time The system shall also allow attaching multiple files to a single document record where needed.		
8.24.3.	Search and Retrieval – The system shall provide robust search and retrieval capabilities, allowing users to locate documents using: - Document Name / Title - Case Number / Reference Number - Document Type / Category - Branch / Department - Uploaded Date / Date Range - Uploaded By Users shall be able to filter and sort search results by any metadata field and download single or multiple documents as required.	A	Compliant
8.24.4.	Audit and Security – The system shall maintain a complete audit trail of all document uploads, modifications, and downloads. Access control mechanisms shall ensure that only authorized users can view, upload, or download documents, maintaining confidentiality and compliance with organizational policies.	A	Compliant
8.24.5.	There should be option to make and check the request at branch level.	A	Compliant
8.24.6.	There should be option to make and check the request at head office level.	A	Compliant
8.24.7.	There should be an option to view all returned or rejected requests along with the reason and complete return/reject history log.	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.24.8.	There should be an option to modify or edit a request if its status is either 'Draft Saved' or 'Returned'.	A	Compliant
8.24.9.	A complete log history should be maintained for each request, including every instance the request has been returned.	A	Compliant
8.25.	Reports	A	Compliant
8.25.1.	Reporting সংযোজনী-ক- for BB	A	Compliant
8.25.2.	Reporting সংযোজনী-খ for BB	A	Compliant
8.25.3.	Reporting সংযোজনী-গ for BB	A	Compliant
8.25.4.	Reporting. Total Case Summary/report for Management based on different nature of the case.	A	Compliant
8.25.5.	Reporting/summery on cases by bank and against Bank in lower court/High Court.	A	Compliant
8.25.6.	RIT and BR-4 for BB	A	Compliant
8.25.7.	BB Audit-Artha Rin Suit	A	Compliant
8.25.8.	All Certificate Owned Property List [(33(5) & 33(7) separate certificate list]	A	Compliant
8.25.9.	DBI 22 to BB	A	Compliant
8.25.10.	District wise Artha Rin case Statement/Court Wise Statement and other parameter	A	Compliant
8.25.11.	Major Financial Indicator	A	Compliant
8.25.12.	CRMR	A	Compliant
8.25.13.	ISS Report	A	Compliant
8.25.14.	Statement of Classified Loans & Advances and Other Information	A	Compliant
8.25.15.	Statement of Pending Cases/disposed cases/settled cases on different parameter required bank	A	Compliant
8.25.16.	Taskforce Report	A	Compliant
8.25.17.	Bangladesh Bank Case related details Statement	A	Compliant
8.25.18.	Portfolio summery	A	Compliant
8.25.19.	Segment wise summery	A	Compliant
8.25.20.	Officer wise summery	A	Compliant
8.25.21.	Case Disposal Summery	A	Compliant
8.25.22.	Step Completion Report	A	Compliant
8.25.23.	Lawyer Wise Summery	A	Compliant
8.25.24.	LRM wise Case Statement Step changed	A	Compliant
8.25.25.	Case Pending at The Same Steps	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.25.26.	Time Duration between Last date & Next Date	A	Compliant
8.25.27.	Summary on Lawyer's Performance	A	Compliant
8.25.28.	Court Location Wise Summary	A	Compliant
8.25.29.	HCD & AD Pending Cases Statement (Summary)	A	Compliant
8.25.30.	HCD & AD Case Filed Statement	A	Compliant
8.25.31.	HCD & AD Portfolio Summery	A	Compliant
8.25.32.	Pending Cases Statement (Lawyer/Law Firm wise/branch wise/month wise/quarter wise/half yearly wise/yearly)	A	Compliant
8.25.33.	Disposed Cases Statement (Lawyer/Law Firm wise/branch wise/month wise/quarter wise/half yearly wise/yearly)	A	Compliant
8.25.34.	1 st Legal Notice served Report	A	Compliant
8.25.35.	CMA Report	A	Compliant
8.25.36.	Lawyer Wise Legal Notice	A	Compliant
8.25.37.	Summery On Recovery on different parameter (monthly/quarterly/half yearly/yearly and other parameter as required.	A	Compliant
8.25.38.	Summery On Next Steps	A	Compliant
8.25.39.	Summery on Closed Accounts	A	Compliant
8.25.40.	Account Wise Lawyer Bill	A	Compliant
8.25.41.	Lawyer Bill Summery	A	Compliant
8.25.42.	Court Fee Summery	A	Compliant
8.25.43.	Account wise court fee	A	Compliant
8.25.44.	Account wise publication bill	A	Compliant
8.25.45.	Report/summery on Auction (u/s-12/33(1),33(4), 33(5), of Artharin Adalat Ain) published (monthly wise/Quarterly/half yearly/yearly)	A	Compliant
8.25.46.	Report/summary on summons notice published in Newspaper (monthly wise/Quarterly/half yearly/yearly)	A	Compliant
8.25.47.	Ensuring reporting as BB Risk Base Audit module newly introduced by BB	A	Compliant
8.25.48.	Report/summery on legal expenses incurred already or to be incurred on different parameters (monthly wise/Quarterly/half yearly/yearly)	A	Compliant
8.26.	Notification	A	Compliant
8.26.1.	Artha Execution Case filed Reminder (After 60 days of date of Decree)	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.26.2.	Case Notification on fixed date before 3/2 working days with SMS & Email to Dealing officer & BM and other concerned officials/lawyer as required time to time.	A	Compliant
8.26.3.	Next Date not updated/steps not taken in cases	A	Compliant
8.26.4.	Certificate owned property notification - After reasonable months of Date of Certificate for banks Steps (time duration may be fixed by Bank)	A	Compliant
8.26.5.	Notification to lawyer to submit bill copy of long pending bills	A	Compliant
8.26.6.	Notification to lawyer to give update to bank officials after fixed date in case	A	Compliant
8.26.7.	A complete account-wise communication log covering all demand notices, acknowledgements, court orders and internal communications with system-generated traceability	A	Compliant
8.27.	Customer 360 Search	A	Compliant
8.27.1.	The system shall provide a consolidated view of all customer-related information across multiple systems. It shall allow users to efficiently search, retrieve, and analyse complete customer data for legal, financial, or operational purposes, thereby supporting informed decision-making, audit efficiency, and compliance. The system shall include the following features	A	Compliant
8.27.2.	Search and Retrieval – The system shall enable users to search for customers using multiple parameters, including: - Customer Name - Customer ID / Borrower ID - Account Number - Case Number / Legal Matter ID - Phone Number / Email - National ID / Tax ID (if applicable) - Branch / Region - Date of Registration / Activity Date Range The system shall support filtering and sorting of results based on metadata or relevant fields. It shall provide partial match, exact match, and advanced query options for precise search results	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.27.3.	Customer 360 View – Upon selecting a customer, the system shall display a comprehensive consolidated view, including: • Personal Information: Name, contact details, identification numbers, and address. • Legal Cases / Matters: All pending, ongoing, and closed cases; including Warrant of Arrest (WOA) records and court hearing details. • Financials: Details of deposits, withdrawals, bail money transactions, loans, and other relevant financial activities. • Document History: Access to all uploaded legal documents, agreements, notices, and receipts linked to the customer. • Interaction History: Notes, communications, or other recorded interactions with branch or Head Office. • Arrest / Bail History: Records of arrests, bail deposits, withdrawals, and related expenses, where applicable.	A	Compliant
8.28.	Legal Memos and Notices Publication	A	Compliant
8.28.1.	The system shall provide a facility to publish legal-related memos and notices to designated users, ensuring timely communication and visibility. The system shall include the following features.	A	Compliant
8.28.2.	Memo and Notice Entry – The system shall allow administrative users to create and publish memos or notices. Each entry shall include: • Title and description of the memo or notice • Target group(s) and department(s) for distribution • Expiry date indicating until when the memo or notice is active and visible	A	Compliant
8.28.3.	User Dashboard Display – The system shall display active memos and notices on the dashboard of relevant users based on their group or department. Users shall only view	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	memos and notices until the specified expiry date.		
8.28.4.	Expiry Management – The system shall automatically remove expired memos and notices from user dashboards, ensuring that only relevant and up-to-date information is visible.	A	Compliant
8.29.	System Settings	A	Compliant
8.29.1.	The system shall provide an administrative interface for configuring system-wide and user-specific settings. This functionality shall enable secure, flexible, and centralized management of access controls, security parameters, and system behavior. The system shall include the following features:	A	Compliant
8.29.2.	User Credential Configuration – The system shall allow administrators to define parameters related to user credentials, including: User ID Length: Minimum and maximum allowed length for user IDs.	A	Compliant
8.29.3.	Password Policy: Minimum and maximum length, complexity rules, and expiration settings for passwords.	A	Compliant
8.29.4.	Password Lockout: Number of failed login attempts allowed before the account is locked.	A	Compliant
8.29.5.	Captcha Configuration: Option to enable or disable CAPTCHA after a specified number of failed login attempts.	A	Compliant
8.29.6.	Session Management – The system shall provide configurable session management options, including: - Session Idle Timeout: Duration of inactivity after which a user session is automatically terminated. - User-Specific Session Timeout: Ability to define different session idle times for specific users or user roles, if required.	A	Compliant
8.29.7.	API Configuration – The system shall allow administrators to configure API-related settings, including enabling/disabling APIs, setting authentication keys or tokens,	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
	defining endpoint access, and controlling data access levels.		
8.29.8.	Audit and Monitoring – All changes to system settings shall be logged with timestamp, user details, and type of change to ensure full traceability and support audit requirements.	A	Compliant
8.29.9.	Audit Log and User Access History	A	Compliant
8.29.10.	The system shall maintain a comprehensive record of all user login and activity events to ensure accountability, security, and audit compliance. The functionality shall include the following features	A	Compliant
8.29.11.	User Login and Logout Tracking – The system shall record every user login and logout event, capturing details such as timestamp, user ID, and IP address. This shall enable monitoring of user activity and session patterns across the system.	A	Compliant
8.29.12.	Active and Inactive User Management – The system shall provide administrators with the ability to view and download lists of active and inactive users. This shall facilitate user account management, monitoring, and timely follow-up on inactive accounts.	A	Compliant
8.29.13.	User Activity History – The system shall allow administrators to retrieve detailed histories of user activities, including actions performed within the system, timestamps, and affected records.	A	Compliant
8.29.14.	User Log History Retrieval – The system shall enable administrators to generate and download comprehensive log reports for any selected user or period, supporting audit, compliance, and security investigations.	A	Compliant
8.29.15.	Audit Compliance – All records shall be maintained in a secure, tamper-evident manner to support internal and external audits, ensuring traceability and accountability of all user actions.	A	Compliant
8.30.	Legal Opinion Management System	A	Compliant

SL	Details Requirements	Bidder's Response	
		(A/PA/NA)	Remarks
8.30.1.	A structured system for managing requests, provision, and archiving of legal opinions, enabling users to:	A	Compliant
8.30.2.	a. Submit and track legal opinion requests. b. Record and store legal opinions against the relevant account or matter. c. Retrieve past opinions for reference and consistency. d. Monitor response timelines and pending requests.	A	Compliant
8.31.	Task Management System	A	Compliant
8.31.1.	A work request and task assignment module enabling the Legal Division to:	A	Compliant
8.31.2.	a. Send, receive, and track work requests and documents internally and from branches. b. Assign tasks to specific officers with deadlines. c. Monitor task completion status. d. Maintain a record of all tasks and their outcomes for audit purposes.	A	Compliant

**Marks distribution A=100%, PA=50-80%, NA=0%. In case of feature which is currently unavailable but can be introduced in future should be mentioned in Remarks with possible timeline and will be evaluated based on that.*

Manpower and Resource Requirement for a Litigation Management System (LMS) Implementation from Bank Asia

Identification of key resources from relevant divisions such as Technology, Legal, General Banking etc.

Nomination of business experts for each domain, specifying as below:

Sl.	Area of expertise / Domain (Technology, Legal, General Banking etc.)	Role and responsibility in the project	Years of experience in respective domain	Involvement level (full-time/part-time/advisory) during implementation	Position (Leading /Desk official)

HARDWARE SPECIFICATION

(If solution requires Hardware & Server)

Mention the Location (DC/DR/NDR) and zone wise and use the below pattern for each

S/N	Items/Feature	Technical Specification & Standard
1	Brand	Dell Technologies
2	Model	PowerEdge R760 Rack Server (Enterprise Class)
3	Country of Origin	USA
4	Country of Assemble / Manufacture	Malaysia / China (Dell OEM Plant)
5	Form factor	2U Rack Mountable with ReadyRails Sliding Rails
6	Processor Socket	Dual Socket (2 Sockets populated)
7	Processor	2x Intel Xeon Silver 4410Y (2.0GHz, 12C/24T, 30M Cache)
8	Memory	128GB (4x 32GB) DDR5-4800MHz RDIMM ECC, max 1TB
9	RAID Controller	Dell PERC H755 SAS/SATA RAID Controller (8GB NV Cache)
10	Boot Optimized Storage	Dell BOSS-N1 with 2x 480GB M.2 NVMe SSD (RAID 1 for OS)
11	Hard Drives	4x 1.92TB Enterprise SATA/SAS SSD 2.5in Hot-plug (RAID 10)
12	Chassis Configuration	2.5-Inch Chassis with up to 8 Hot-Plug Drives
13	Fiber Channel Adapters	Dual Port 16Gbps / 32Gbps FC HBA for Enterprise SAN
14	Network Card	Broadcom 57412 Dual Port 10GbE SFP+ & Dual Port 1GbE
15	Systems Management	iDRAC9 Enterprise with OpenManage Enterprise Integration
16	Supported operating systems	Red Hat Enterprise Linux 9 / VMware vSphere ESXi 8.0
17	Power Supply	Dual, Hot-plug, Redundant Power Supply (1+1), 800W Platinum
18	Security	TPM 2.0, Silicon Root of Trust, Secure Boot, System Lockdown
19	Accessories	Dell 2U Sliding Rails with Cable Management Arm, Power Cords
20	Warranty	3 Years Dell ProSupport with 24x7 4-Hour Onsite Mission Critical
21	AMC	Comprehensive Hardware AMC available post-warranty

- If required add additional pages for the specifications with required quantity for each.

ADDITIONAL ITEMS (if required)

Virtualization Software, Operating Systems (OS), Database (DB), Middleware, etc. (if any)

SL	Items	Descriptions	Qty
01	Functional User Training	Comprehensive training for Legal Division & Branch Officers (5 Days @ BDT 5,000/day)	1 Batch (30 Users)
02	System Admin & IT Training	Technical training for Bank Asia IT, DBAs & Security (3 Days @ BDT 5,000/day)	1 Batch (10 IT Staff)
03	Total Training & Rate	Per Diem: BDT 5,000.00/day (Excl. Tax) / BDT 5,750.00/day (Incl. 5% VAT & 10% AIT). Total: BDT 46,000.00	8 Days Total (2 Batches)

- If required add additional pages for the specifications

9. Financial Proposal Submission Format

Litigation Management System (LMS)

Product Name	Proposed Product [License detail (module, user, etc.) and offered BOQ detail with the line of items]	Model /Version	Qty	Unit Price	Tax, VAT, AIT (Mention the %)	Total Price	Yearly AMC after 3 rd Year inclusive all			Grand Total
							4 th Year	5 th Year	6 th Year	
Litigation Management System (LMS)	Skoder LMS Enterprise (Case Tracking, Recovery, Auction, WOA, CBS API) with 3-Yr Warranty			1,500.00	VAT 5% (75k) + AIT 10% (150k) = 15% (225k)	1,725.00				2,932,500.00
Grand Total: BDT 2,932,500.00 (In words: Taka Twenty-Nine Lac Thirty-Two Thousand Five Hundred Only)										

- Quoted prices must be Including VAT & TAX/AIT.
- Quoted prices must be in BDT. AMC amount shall be equal for every year (4th, 5th & 6th Year).
- Training proposal must be submitted separately.

Additional Licensing requirements for future scope and Rate of those items:

Item Name	Total Price
Functional & Technical Training (as per Clause 308 & 1673)	BDT 5,000.00 per day (Excl. VAT/Tax) / BDT 5,750.00 per day (Incl. VAT 5% & AIT 10%)
Additional Custom Module / CBS Integration (Future Scope)	BDT 150,000.00 per module (Inclusive of all Taxes)

Declaration:

- ✓ License detail has been provided
- ✓ BOQ detail with the line of items has been provided
- ✓ Price has been quoted against the responded specifications attached herein
- ✓ Price includes VAT and all applicable taxes as per Govt. Rules
